SUSTAINABLE APPAREL AND ACCESSORIES

2020

**As we come together** in this unique moment in our collective human history, we see the value in cultivating more love, more beauty and more hope. Some of us will embark upon this mission with renewed vigor, propelled by urgency and thoughts of building something worth sharing with those who will come after us. To be sure there will be those too who will find big, bold expressions appropriate while still others will opt for quiet, deliberate demonstrations of the best parts of humanity.

Making organic cotton tee shirts is our contribution to our vision of a future that honors mother earth. The idea that we can return to systems that rely on the intrinsic genius of ecosystems humming along, creating balance, radiating with vitality— is the very thing that drives us. We look to our poets, our farmers, our makers, and our shared love of this planet— to guide us. We stand together ready to co-create a world that speaks to our shared aspirations. Join us, won't you?

## **Our Planet, Our Purpose**

**ORGANIC MAKES A WORLD OF DIFFERENCE!**

	<b>SEED PREPARATION</b>	<b>SOIL &amp; WATER</b>	<b>WEED CONTROL</b>	<b>PEST CONTROL</b>	<b>HARVESTING</b>
<b>ORGANIC COTTON</b> Production Processes	use untreated seeds; never use GMO seeds	build strong soil through crop rotation; retain water more efficiently due to increased organic matter in the soil	physical removal rather than chemical destruction; controlled through cultivation and hand hoeing	maintain balance through healthy soil; use beneficial insects, biological and cultural practices; may use trap crops to lure away insects	relies mostly on seasonal freeze for defoliation; may stimulate defoliation through water management
<b>CONVENTIONAL COTTON</b> Production Processes	typically treat seeds with fungicides or insecticides; use GMO seeds for approximately 70% of US-grown cotton	apply synthetic fertilizers; loss of soil due to predominantly mono-crop culture; require intensive irrigation	apply herbicides to soil to inhibit weed germination; repeatedly use herbicides to kill weeds that do grow	use insecticides heavily, account for ~25% of world consumption; use pesticides, commonly toxic and carcinogenic; frequent use of aerial spraying	defoliates with toxic chemicals

### LET'S ABANDON SINGLE-USE BAGS!

*It just makes sense, especially when you consider the cost single-use bags require. Did you know...?*

- *Americans use 100 **BILLION** plastic bags a year, which require 12 million barrels of oil to manufacture.*
- *Plastic bags are used for an average of 12 minutes.*
- *It takes 500 (or more) years for a plastic bag to degrade in a landfill.*

### **HEMP BLEND**

For over 10,000 years, people have used hemp fiber because of its strength and ability to grow rapidly with less water than cotton. The fibers from the hemp stalk are among the earth's longest, soft natural fibers, producing uniquely beautiful finished fabrics. And that's not all; one acre of hemp can produce as much fiber as two acres of cotton with less need for pesticides. And since the first American flag was made from hemp, we think it's only right to fly our hemp flag high today!
